Roles and Responsibilities

- Develop, implement, and maintain and review Health, Safety, and Environmental (HSE) management systems documents in compliance with ISO 9001, ISO 14001, and ISO 45001 standards.
- Conduct regular site inspections and internal audits to ensure adherence to project-specific health and safety requirements across installations and service operations.
- Lead risk assessments and hazard identification processes for systems, ensuring proactive mitigation strategies.
- Monitor and evaluate subcontractor compliance with HSE policies and local regulatory requirements.
- Prepare and deliver HSE training programs for site personnel, engineers, and technicians to promote a culture of safety and continuous improvement.
- Investigate incidents, near misses, and non-conformities; prepare detailed reports and implement corrective and preventive actions (CAPA).
- Coordinate with project managers, other teams, and client representatives to integrate HSE considerations into project planning and execution.
- Maintain documentation and records for audits, inspections, and certifications, ensuring traceability and regulatory compliance.
- Support the commissioning and handover process by verifying that all systems meet HSE benchmarks.
- Promote environmental sustainability through waste management, energy efficiency, and pollution prevention initiatives on project sites.
- Efficiently lead a team HSE Officers assigned
- Conduct daily site inspections to ensure compliance with safety protocols and identify unsafe conditions or practices.
- Enforce the use of Personal Protective Equipment (PPE) and ensure proper signage and barricading at work zones.
- Monitor high-risk activities such as working at heights, confined space entry, and electrical installations, ensuring permit-to-work systems are followed.
- Liaise with site supervisors and foremen to implement corrective actions for health and safety violations issues.
- Ensure emergency response plans are in place and conduct regular drills for fire, evacuation, and first aid scenarios.
- Maintain site HSE logs including inspection reports, incident records, toolbox talks, and training registers.
- Prepare weekly and monthly HSE performance reports for management and client review.
- Support external audits and client inspections by providing necessary documentation and site walkthroughs.
- Conduct induction training for new workers and subcontractors on site-specific HSE requirements.
- Organize regular toolbox talks and refresher sessions on critical topics like electrical safety, manual handling, and fire prevention.
- Encourage reporting of near misses and safety observations to foster a proactive safety culture.
